

match2go Spectrophotometer

The Ultimate Color Match for Architectural & Industrial Coatings

match2go Spectrophotometer

Transform your color-matching process with our cutting-edge portable spectrophotometer, designed to empower you with unparalleled accuracy and efficiency in the store or the field.

Experience the perfect fusion of innovation and practicality with our portable spectrophotometer. The brilliant, extra-large color display features state-of-the-art capacitive touch technology, allowing you to swipe, touch, and measure effortlessly, even while wearing gloves. The screen automatically adjusts its orientation, ensuring a seamless user experience.

- Portable and ergonomic design for easy handling
- Brilliant, extra-large color display with capacitive touch technology
- Intuitive, customizable icon-based menu for user-friendly navigation
- Storage capacity of 15,000 standards with several fan decks preloaded
- Advanced diffuse illumination system with 25 LEDs and SPIN mode
- Slim design for comfortable desk placement
- Dedicated docking station for safe and convenient storage of calibration and checking standards
- Flexible data transfer options, including wireless connectivity
- Excellent search results driven by data compatibility and outstanding spectrophotometer performance
- High matching rates and color correction functionality based on reproducible database results and excellent technical performance

Slim Design

The spectrophotometer's slim design allows it to fit comfortably on your desk. The dedicated garage offers safe and convenient storage for calibration and checking standards, protecting your investment. You can enjoy a boundless and flawless workflow with flexible data transfer options, including wireless connectivity.

Color Matching Accuracy

Trust in the excellent search results driven by data compatibility and outstanding spectrophotometer performance in accuracy, repeatability, and inter-instrument agreement. Our comprehensive color-matching database, set up with the BYK-Gardner auto-match spectro, ensures precise and consistent color matching across all devices.

The match2go, paired with the RCS Retail Paint software, represents a significant leap forward in color matching for retail paint stores. By providing the convenience of quickly identifying the closest matches within existing color collections and the flexibility to create custom colors, this instrument empowers paint professionals to deliver unparalleled service and value to their customers. Embrace the power of the match2go and elevate your paint store's offerings to new heights, ensuring that every customer leaves with a smile and a perfect color match in hand.

With high matching rates, color correction functionality based on reproducible database results, and excellent technical performance, you can be confident that your selected colors will be exactly alike from can-to-can, and shop-to-shop.

Navigation

Navigating the device is a breeze with the intuitive, customizable icon-based menu. Store up to 15,000 standards, ensuring you have all the references you need at your fingertips.

The advanced diffuse illumination system with 25 LEDs and SPIN mode guarantees accurate color measurements, while the optional 60° gloss geometry, compliant with international standards, provides versatility in your measurements.

Revolutionary

Embrace the future of color matching with our portable spectrophotometer. Invest in a tool designed to revolutionize your architectural and industrial coatings projects and experience uncompromising accuracy and efficiency.

	match2go d:8°	match2go 45/0
Catalog Number	7625	7640
Measuring Geometry	d:8°	45/0
Light Resource	LED's with 10 years warranty	
Spectral Resolution	10 nm	
Spectral Range	400 - 700 nm	
Repeatability	0.01 ΔE^* (10 consecutive measurement on white)	
Reproducibility	0.20 ΔE 94	
Temperature Stability	+10 °C to +40 °C (50 °F to 104 °F)	
Measurement Time	< 3 sec.	
Memory Capacity	4,000 standards and 10,000 samples (allocation configurable)	
Battery	Built-in Lio-ion rechargeable (charging via USB Type C)	

Meets ASTM and ISO Standards

Global Service & Support any time, anywhere

Our global presence and network of qualified agents and resellers BYK-Gardner instruments are available worldwide. Our warehouses around the world ensure short delivery times for instruments and accessories. The BYK-Gardner application department will support you globally with technical expertise.

Visit our website www.byk-instruments.com for more information.

Our dedicated BYK-Gardner service points are there to help you get the most out of your instrument. Globally, we are available for recertification according to ISO 17025 or to meet your other technical service needs.

Standard configuration

- Instrument
- Power Supply
- Power Cord
- Communication Cord USB-C
- Docking Station
- Calibration Tiles
- WiFi and Bluetooth
- Carrying Case
- Dust Cover
